

Environmental Policy Statement for CES Quarry Products Ltd

CES Quarry Products Ltd is a family owned aggregates business based in County Down. The Company established in 1948 is a leading provider of crushed stone, concrete blocks, bricks and ready-mix concrete. As such we recognise that through our operations, across Northern Ireland, we have a broad range of impacts on the environment. These occur principally in the following areas:

- atmospheric emissions from our processing activities and support functions;
- water discharges;
- the generation, handling and disposal of waste products;
- the storage and handling of materials;
- raw material use and energy consumption.

It is our stated intention, through this policy, to minimise and, wherever practicable, eliminate these impacts. We aim to achieve this through the operation of an environmental management system developed in line with the requirements of ISO14001:2004 and in accordance with the principle of continuous improvement. Through the setting of environmental targets and the integration of these targets into the day to day running of our business we aim to progressively improve our environmental performance. We are committed to preventing pollution and as a minimum to the compliance with all relevant legislation and other policy requirements to which we subscribe.

This environmental policy has been communicated, implemented and maintained at all levels within the Company. It is available to all our stakeholders upon request and through its incorporation into our website www.cesquarryproducts.com.

We recognise the challenge which lies ahead and are determined all at CES Quarry Products Ltd shall be equal to this challenge.

Managing Director
Paul Stevenson
